

MC BOX

Multi user control panel

The MC Box fuel management panel has the capability to control and manage the consumption of fuel for the private and commercial user sector.

Its intelligent design allows the unit to be easily connected or added to both new and existing pumps providing low cost, simple, easy to use fuel management .

The Mc Box is the perfect solution as an "Add on" unit for existing pumps or where it is preferable to have the pumps and control panel installed in two different places.

The MC system consists of a dedicated multi-user panel with the option to connect to a PC.

The control panel has the ability to:

- Switch a pump on/off
- Recognize authorised users by means of i-button key or pin code
- Preset a quantity to dispense
- Manage a pulse meter to measure quantity dispensed
- Manage an external level switch to control pump operation on low level
- Operate an external nozzle switch
- Connect to a PC for exporting data files
- Connect to an external printer

The system is easy to install and has excellent weather resistance. The wiring connections are located in an easy to access electric box.

The MC BOX is equipped of:

- **code 12708**: for access to supplies by key users and data download to PC with key manager without the need for cable connection

Or:

- **code 12710**: For data download to PC through cable connection up to 800 meters.
